JUDGE 1	NAIL LENGTH The length must be consistent and proportional to the hand and fingers on all 5 nails. Nails should be in line with the proximal phalanges and metacarpal heads. The pinkie must be shorter than the ring and index fingers. The ring and index fingers must be shorter than the middle finger and thumb. The ratio of the free edge length to the nail bed must not be less than ½ of the nail plate and must not exceed the full length (1:1) of the nail plate.	20	
	C-CURVE The C-curve must follow the shape of the nail along its entire length on both the convex and concave sides. It must be symmetrical and even on all fingers. The C-curve should measure between 30–50% of a circle on all 5 nails. Do not mix — choose one!	20	
	APEX The highest point of the apex and the arch must be consistently placed on each nail with correct alignment according to the nail's shape. It should not be overly pronounced and must look elegant. The apex should be consistent and even on all nails. When viewed from the side, it should be positioned between 25% and 50% of the entire nail bed.	20	
	UKUPNI BODOVI SUDIJA 1	60	
JUDGE 2	HAIR LINE & FREE EDGE THICKNESS Nails must be consistently thin across the entire surface, evenly thin on each nail, and no thicker than a credit card. Judges will consider thickness in relation to the degree of difficulty (thinner and more consistent nails are more difficult to create).	20	
	CONVEX & CONCAVE The structure must follow the nail shape consistently along its entire length in both the convex and concave areas. It must be symmetrical and even on all fingers. The lower side lines (underneath the nail) in the convex and concave parts should be as thin as a hairline or thinner, but even and consistent on both sides.	20	
	UKUPNI BODOVI SUDIJA 2	40	
JUDGE 3	UPPER ARCH – UPPER SIDE LINE (TOP & SIDE VIEW) From the nail's side profile, the upper arch extension must be consistent with the chosen C-curve (30% or 50%) on all 5 nails. From the top view, side lines must not be wider than the natural nail's lateral lines or over-filed. From the top, side lines may extend straight out or taper slightly from the sidewalls, depending on the shape and structure. Do not mix — choose one!	20	
	LOWER ARCH / LOWER SIDE LINE (SIDE VIEW) The lower side lines must be even, neat, and extend straight from the lateral folds on both sides. They must match the upper arch when viewed from the side, consistent with the nail's shape and structure. There must be no steps or ridges on the sidewalls. When viewed from the C-curve or hairline perspective, both side lines should end at the same height.	20	
	UKUPNI BODOVI SUDIJA 3	40	

JUDGE 4	NAIL SHAPE The shape of the nails must look consistent and uniform when viewed from above and from the model's perspective. Any shape is allowed, as long as it is consistent across all 5 nails. Do not mix — choose one!	10	
	SMILE LINE Consistent shape across all 5 nails, evenly applied so the tips align perfectly, with no shadows, dips, cloudiness, marbling, or waves. The smile line on the index and ring fingers should have the same length measured from the cuticle area to the deepest point of the smile line. The pinkie smile line should be shorter than the index and ring fingers. The middle finger's smile line should be longer than the ring and index fingers and the same as the thumb. The smile line must be balanced and in harmony with the hand, fingers, nail shape, and cuticle area.	10	
	APPLICATION OF WHITE Even product application with no shadows, bubbles, or pits, and consistent across all 5 nails. Sharp color division at the smile line with no pink or clear visible on the white extension.	10	
	UKUPNI BODOVI SUDIJA 4	30	
JUDGE 5	NAIL BED / APPLICATION OF PINK, CLEAR, OR CAMOUFLAGE COLOR Even product application, no shadows, bubbles, dips, cloudiness, marbling, and consistent across all 5 nails. Sharp division of color at the smile line and smooth blending toward the cuticle area. Choose transparent pink, clear, and/or camouflage, but be consistent on all 5 nails! The nail beds on the index and ring fingers should be of equal length, measured from the cuticle area to the deepest point of the smile line. The pinkie nail bed should be shorter than the index and ring fingers. The middle finger nail bed should be longer than the ring and index, and the same as the thumb. Use transparent pink, clear, or camouflage for all nails! The nail bed color should complement the skin tone.	10	
	CUTICLE AREA No cuts or irritation around the skin. Points will be deducted for any damage during the competition. Even product application with no ledge or missing product. The enhancement should look and feel as if it grew naturally from the finger.	10	
	FINISH / TOP GLOSS / HIGH SHINE All nails must be brought to a high-gloss shine across the entire convex surface. There should be no visible file scratches or matte areas due to unevenness. Nails must shine like glass.	10	
	UKUPNI BODOVI SUDIJA 5	30	
JUDGE 6	FORM FIT / MATERIAL RESIDUE Exact fit of the sculpting form is required, without any filing dust, polish, or product residue under the enhancement.	10	
	SURFACE SMOOTHNESS No file lines or indentations. The finished product must be smooth, without bumps, dips, or rough matte spots.		
	UKUPNI BODOVI SUDIJA 6	20	

TOTAL SCORE (220)
